

TagMyPicture

Android Application

Application apk is available in the repository.

The application is designed to let android users tag their images stored in their smartphone so that the application will sort them accordingly and it will be easier for users to get access to them as and when they need them. Also, additional features like sharing the photo on other social media applications and setting it as wallpaper, profile photo etc have been provided.

Owners-Abhilasha Gadekar, Allen Mathew

Below are the screenshots of some of the features of the application:
